

SUPERCIVIL™

CAPABILITY STATEMENT

5.2T - 36.0T EXCAVATORS

For over 50 years, Preston Hire has provided quality construction equipment hire and services that our customers have come to count on.

EQUIPMENT HIRE

Our extensive fleet of heavy machinery for hire includes decks, cranes, lifts, propping equipment, earthmovers and excavators, as well as glass-handling machinery. Our superior level of expertise, born of working closely with clients across all facets of construction on projects large and small for 50 years, allows us to provide a solutions-oriented approach to your projects.

QUALITY & SAFETY

Preston Hire places safety and quality management at the core of our business. This is vital for the wellbeing of both our own staff and our customers.

Our mission is to provide the best in current technology and offer products adhering to the highest possible quality and safety standards. We are ISO 9001 quality certified.

SUPPORT

From high-rise construction, to mining, government infrastructure and commercial jobs, our core products and services allow us to work closely with our customers to ensure the best equipment is available to them. Clients we've worked with, from small contractors to some of the biggest names in construction, turn to us time and again because they know they can count on Preston Hire to provide exactly what they need and more.

SERVICE EXCELLENCE

We continually look for better ways of doing things to provide the optimum customer experience and ensure we are not just meeting, but are leading, change. This includes better products, services, and solutions. Our service starts with value-adding advice and goes across every customer touchpoint through to our delivery driver's attitude. With a national footprint and expert staff, Preston Hire's aim is to make every customer's life easy.

APPLICATIONS

Earthmoving equipment encompasses a diverse range of machinery designed to manipulate and move large quantities of earth and other materials. These robust machines have the ability to work in a variety of applications across a wide array of industries, contributing significantly to the progress of construction, mining, and agriculture projects, and more. With their immense power, versatility, and specialised attachments, the Preston Hire catalogue of earthmoving equipment proves indispensable in various applications including:

Excavation & Digging

- Foundation and trenching work
- Building construction and site preparation
- Road and railway excavation
- Landscaping and land clearing

Earthwork Operations

- Building dams, reservoirs, canals, waterways and levees
- Soil compaction for roadways and foundations
- Construction of landfills and waste disposal sites
- Excavation of underground utilities

Agriculture & Forestry

- Handling and moving agricultural products (grain, hay, etc.)
- Handling and transporting logs and timber
- Snow removal and clearing operations
- Tree and vegetation removal

Material Handling & Transportation

- Loading and unloading trucks and transport vehicles
- Stockpile management and material sorting
- Bulk material handling in construction and mining
- Transfer of materials on construction sites
- Recycling and waste management

Grading & Leveling

- Land grading for construction and landscaping
- Stockpile management and material sorting
- Road and runway leveling
- Preparation of agricultural fields
- Creation of embankments, terraces and sports fields

Site Preparation & Clearing

- Clearing land for construction and development
- Vegetation and tree removal
- Debris removal and cleanup

Mining & Quarrying

- Excavation and removal of minerals and ores
- Loading and hauling of materials
- Rehabilitation of mining sites

Demolition & Deconstruction

- Building and structure demolition
- Removal of concrete and debris
- Safe dismantling of structures

TESTIMONIALS

*"GCC Retaining has been working alongside Preston Hire for the past two years. During this time we've had both 14t and 16t excavators consistently on hire while building retaining walls on the Gold Coast, in Brisbane, and on the Sunshine Coast. Whenever there is a problem, their staff is timely to organise assistance. We like to pride ourselves on relationships with businesses that treat us with respect and give their utmost in everything they do. Happy to say we work alongside Preston Hire. We look forward to what obstacles we can overcome in the future together." - **Troy Mapson, GCC Retaining & Construction SEQ.***

*"Over the last 12 months, the staff at Preston Hire have been instrumental in assisting Baltzer Group with our ongoing plant requirements. They always supply top quality assistance throughout the hiring process. We value the customer service the staff provide us and will continue to use Preston Hire." - **Sam Neale, Baltzer Group.***

*"We have hired from Preston Hire at Underwood, QLD numerous times. Everything from 3t to 20t excavators with a variety of attachments, the team are committed to providing us with the best service possible. Our company will continue to use Preston Hire for all our current and future hiring needs. Couldn't be happier with the service we receive with every hire of equipment." - **Dylan Dwyer, Dwyer Landscaping & Construction.***

PREVIOUS PROJECTS

Preston Hire partnered with Geotech in getting piles in for the construction of the Brisbane Metro. A SY155U 16t limited swing excavator was used due to the restricted area of the jobsite.

This snapshot shows the start of the tunnelling portal. The installed piles formed the basis for the tunnelling under Adelaide street through to the middle of the Brisbane CBD.

Preston Hire's trusty 5.3t SuperCivil excavator, the SY50U, was needed to manage loose rocks that had come away as a result of a landslide on the side of a mountain in Queensland. Our handy rock breaker made short work of the unsecured rocks, fixing this safety hazard. Our customer was so impressed with the power of the machine, especially due to its small size, that they now use SANY equipment for all their projects.

NSM Holdings took possession of our SY265 26.5t excavator for a 3-month hire. It was used to dig trenches for the Department of Transport and Main Roads. NSM Holdings was impressed with the digging power of the machine and was able to complete the project ahead of schedule.

General Care Constructions (GCC) took out a long-term hire of a SY155 for 18 months. This type of earthmoving machine typically goes from site to site, drilling holes to construct retaining walls. They are also useful for site clearing, bulking out (loading trucks), and can be used to fit job-specific auger drive drillings.

GCC hired our SY155 with pallet forks to carry equipment, saving the need for a loader on site.

Preston Hire stepped in to help DW Armstrong Services successfully complete a plumbing job with one of our 5t excavators, fitted with a hammer attachment. The trench being dug was filled with hard rocks, which our machine was able to quickly clear.
